Re: Smoking Article PM #576  
Ref. 582-763

Dear Mr. French:

Enclosed is a further example supplied by the inventors, Drs. Rainer and Hoelzel, to illustrate the anti-static utility that we discussed. I also enclose a copy of Litzinger, U.S. 3,716,063, which seems pertinent. Please delete from the application Examples 3, 7 and 8 as we discussed, as well as Claims 4 and 8; it will suffice to leave the statement at P.3 L.12. I understand you are going to add a composition-of-matter claim on the polyethylenimine complex.

Very truly yours,

*MEJ*  
G. Esler Inskeep
